Executive Overview

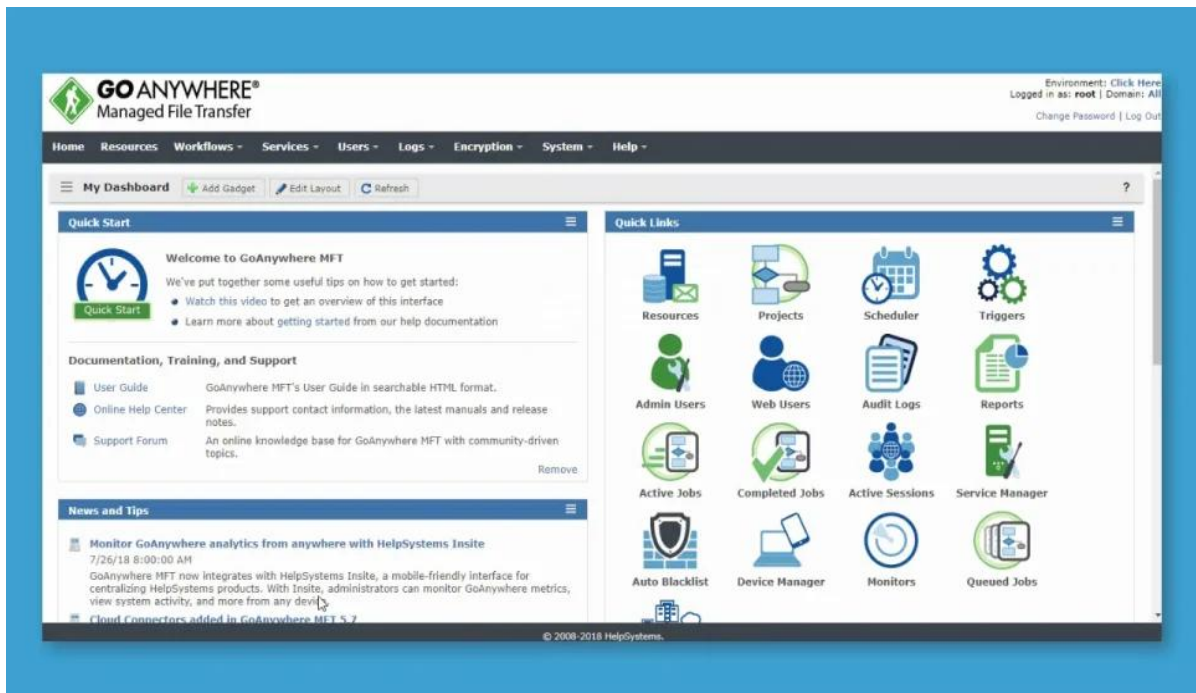

Nexapro Technology specializes in enterprise-grade ETL support, technical operations coordination, workflow troubleshooting, and system continuity for organizations running mission-critical business environments. We bridge modern process efficiency with legacy infrastructure stability, ensuring uninterrupted data movement, reporting accuracy, and secure operational performance.

Our support ecosystem is designed for enterprises that depend on reliable ETL pipelines, scheduled workflows, analytics platforms, and IBM i operational frameworks. By combining technical depth with business process understanding, Nexapro helps organizations reduce downtime, improve incident response, and modernize support without disrupting existing infrastructure.

Core Business Services

- ETL Workflow Monitoring & Session Recovery
- Incident Management, Root Cause Analysis & Escalation
- Secure Managed File Transfer Automation
- BI Reporting Support & Dashboard Reliability
- Legacy IBM i Operational Coordination
- Documentation, Audit Readiness & Process Governance

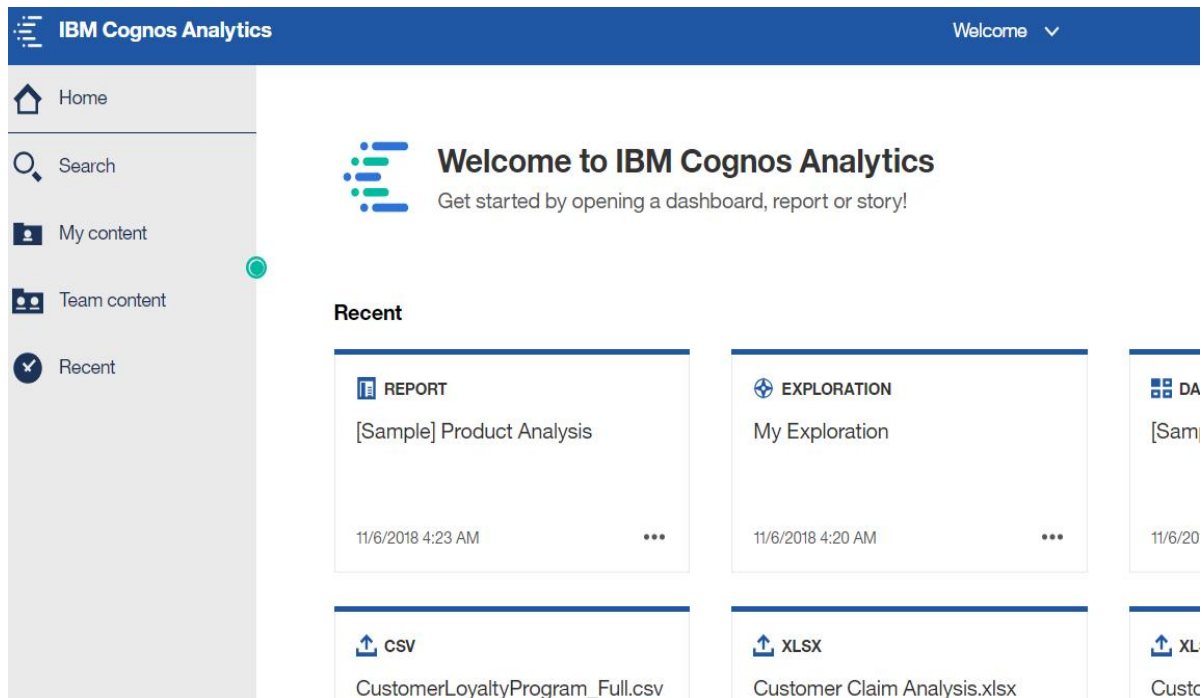

IBM i (AS400)

IBM i (AS400) remains the backbone of many enterprise operations. Nexapro provides command-line operational support, active job queue monitoring, spool file management, subsystem analysis, and issue resolution to maintain uninterrupted business processes.

Business Value: Operational continuity, legacy system stability, production monitoring, and critical process assurance.

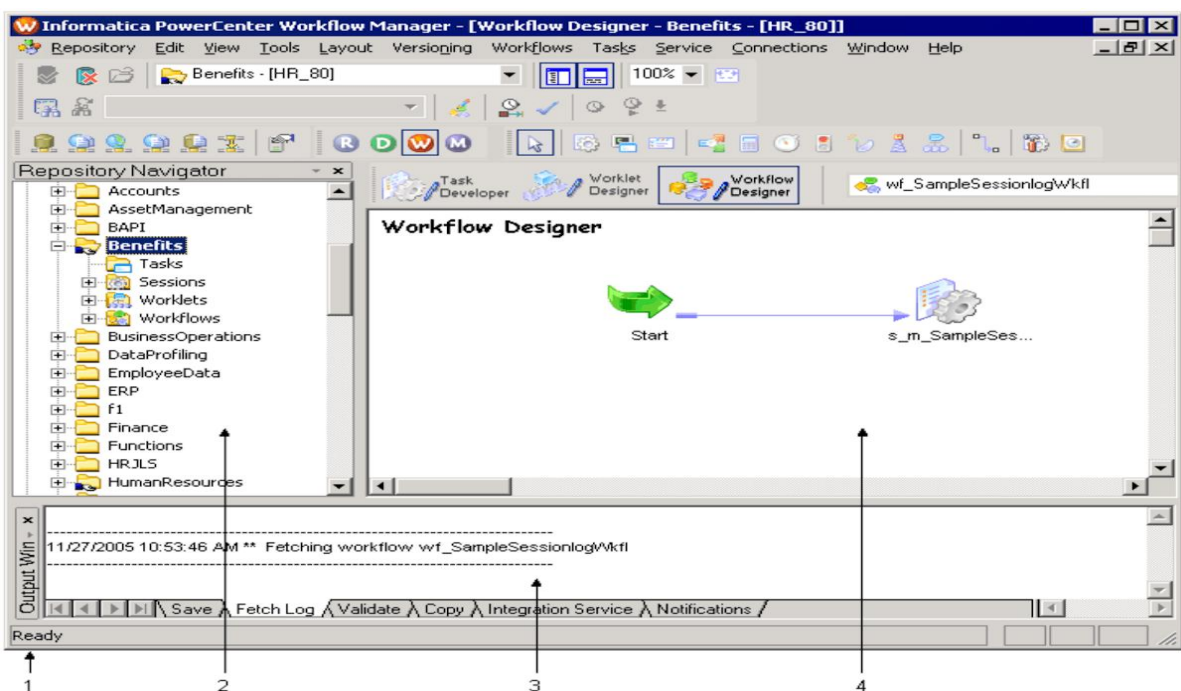

Informatica PowerCenter

Informatica workflows are central to enterprise data integration. Nexapro monitors workflow execution, diagnoses failed sessions, analyzes logs, validates dependencies, and ensures ETL continuity across production pipelines.

Business Value: Reliable data movement, reduced ETL failure risk, integration health, and faster troubleshooting.

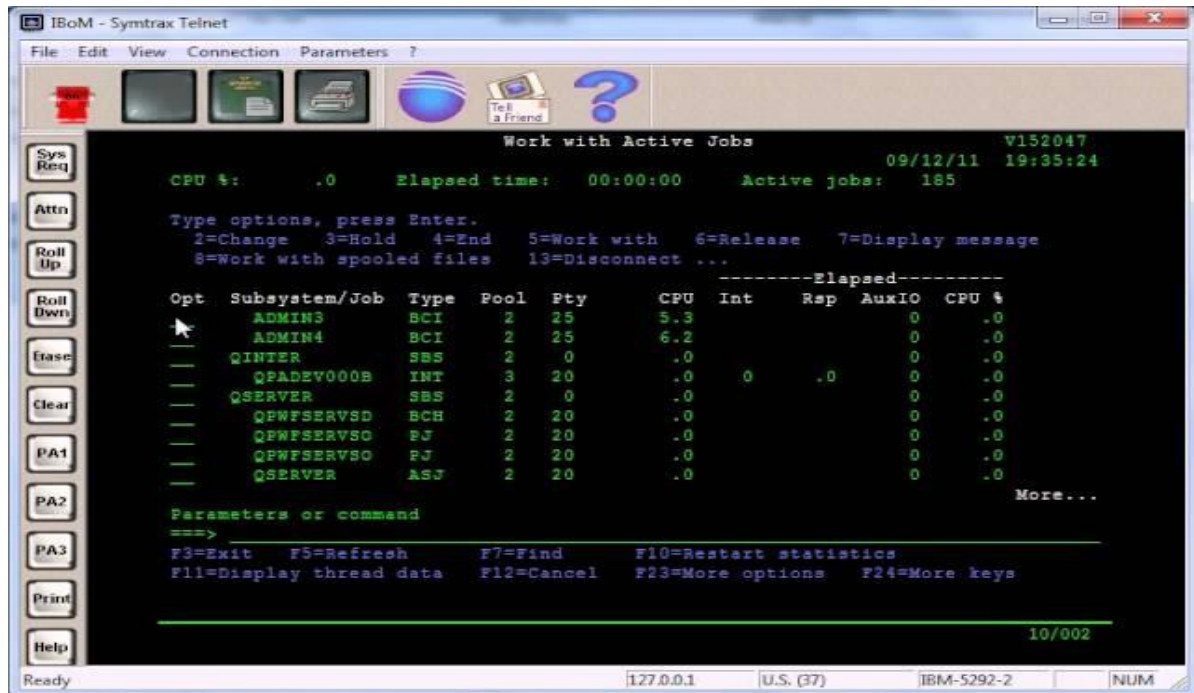

IBM Cognos Analytics

IBM Cognos drives executive reporting and analytics. Nexapro supports dashboard accessibility, report scheduling, troubleshooting failed executions, and performance optimization to keep business intelligence dependable.

Business Value: Decision-making continuity, reporting precision, and BI platform reliability.

GoAnywhere Managed File Transfer

GoAnywhere enables secure enterprise file exchange and workflow automation. Nexapro supports scheduled jobs, encryption processes, transfer workflows, trigger management, and secure system interoperability.

Business Value: Compliance, automation efficiency, secure data transfer, and reduced operational friction.

Why Enterprises Choose Nexapro Technology

Nexapro Technology is built for organizations that need more than basic support—we deliver operational resilience. Our methodology combines technical troubleshooting, process intelligence, escalation discipline, and platform versatility to ensure business-critical systems remain dependable.

Strategic Advantages:

- Faster issue diagnosis & incident turnaround
- Improved ETL and workflow uptime
- Reduced reporting disruptions
- Enhanced security in managed file transfers
- Cross-functional support across legacy + modern ecosystems
- Scalable support for enterprise digital transformation

Capability	Nexapro Business Outcome
Operational Monitoring	Proactive oversight for ETL, jobs, and enterprise workflows
Troubleshooting	Reduced downtime through rapid diagnostics
Documentation	Improved compliance and transparent operations
Automation	Secure, repeatable, and scalable business process execution
Legacy Modernization Support	Connects existing infrastructure with future-ready operational strategy

Let's Build Reliable Enterprise Operations Together

Nexapro Technology supports businesses seeking ETL excellence, secure enterprise operations, and sustainable technical coordination. Whether your ecosystem depends on Informatica, IBM i, Cognos, or GoAnywhere, we provide the expertise to keep systems performing with reliability, security, and measurable business value.
